Unified Province Automation Software

SINGLE-POINT DATA ENTRY WHICH UPDATES ALL RELEVANT REGISTERS

Institutions

House

Member

Province

Superiors

Departments

Functionaries

Provincial

The Most Trusted Province Software

Fully developed, Full featured, in use since 2008.

The most advanced Province automation Software. It enables seamless integration of Province, Members, Communities, Institutions, Candidates, Benefactors, Staff and Volunteers.

The program is designed to implement uniform system across the Province, reduce paper work, quicker communication and automatic data processing. The focus is to provide the benefits of technology that makes Religious life and ministry more relevant.

The software is centrally implemented and maintained. This eliminates separate installation, maintenance, backup at each Community.

Deogracia is developed by Theosys - in operations since 1999 and provides enterprise class email systems, sever co-locations, cloud computing, consultancy and software development with in-house technical expertise.

Software development is a continuous process to keep it updated and upgraded with the ever changing technology and devices. With a common core system, all Provinces get the benefit of timely updates and upgrades at the lowest price.

True automation is the capability to maintain up-to-date records without re-entering same data.

It took years of development and data engineering to accomplish this capability!

HIGHLIGHTS

Simplify administration, automate day-to-day tasks, network all communities and institutions.

Networking and Integration: This is not a website. It is a software system to network all communities, institutions and members to a common platform and digitalize registers, records and day to day administration.

Integrated Website: The system has an integrated website that populates permitted information automatically. Virtually, at the cost of maintaining the website, you get both website, software and mobile app.

9-Tier Data Security: The system follows all required security measures to keep online data secure.

Management Information System: Real-time information, statistics, compliance reports relating to Communities, Institutions and Members are available to the respective departments through their login for timely action and decision making.

Assured Continuity: The system is in use by many Provinces across the world since 2008. Since the main platform is common for all, you get timely updates and upgrades at no extra cost.
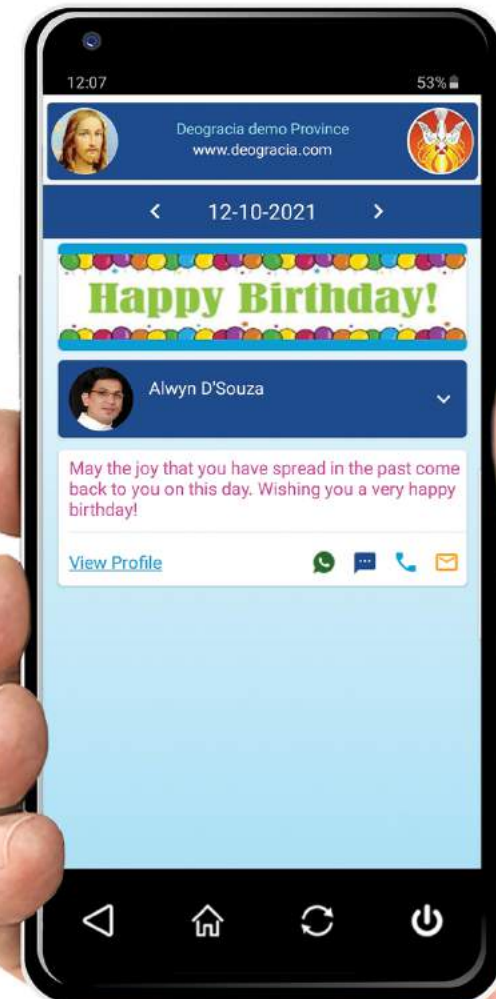

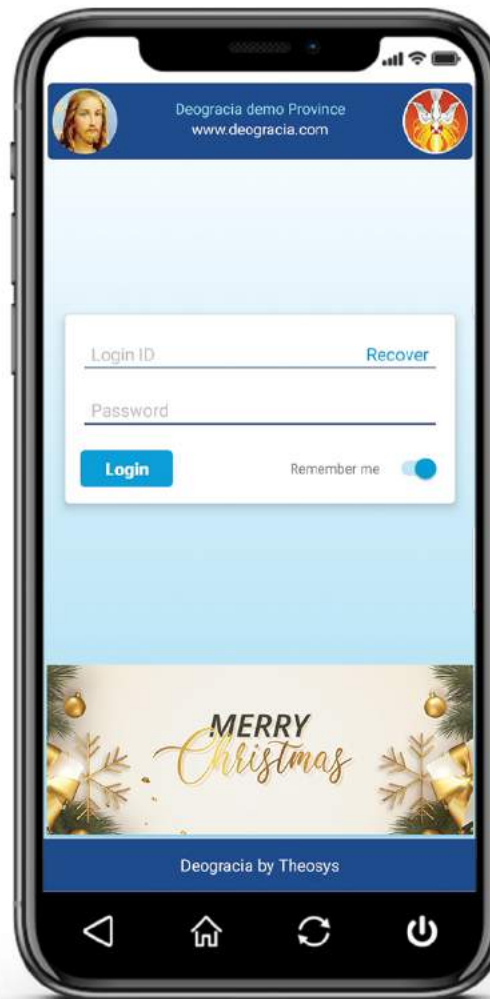

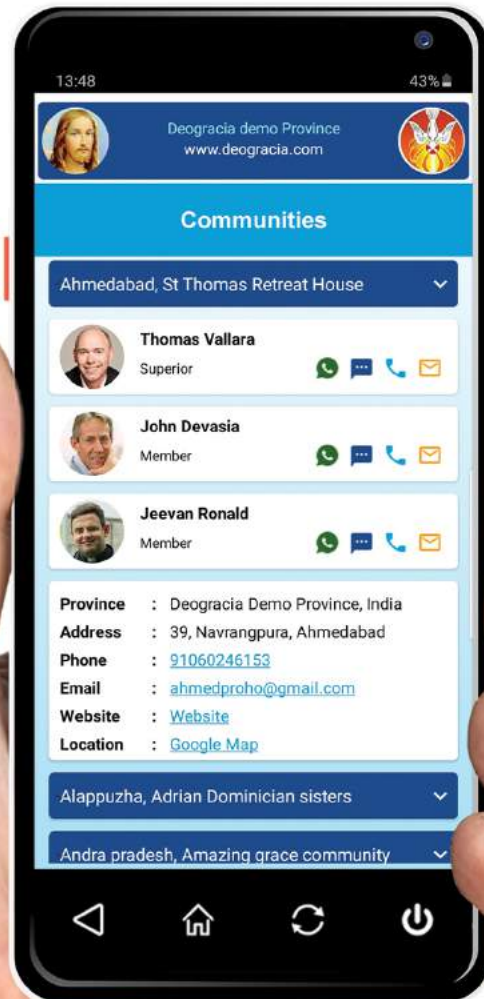

Controlled Communication: The mobile app doubles up as a modern communication platform for the entire Province. Unlike social media, the Province control the content as well as the platform.

Showcase Province Legacy: With access to technology, it is an opportunity for the Province to preserve and perpetuate its legacy on the digital platform for generations to come and leave a lasting impression on who did it for them.

Centralized implementation: The system is centrally implemented, updated and upgraded. Its control remains with the province admin.

Fully Developed, Full Featured, Continuity Assured.

TOP RATED MOBILE APP FOR TOP RATED SOFTWARE

## Stay Relevant with World-Class Technology

MAIN FEATURES

- Communities
- Institutions
- Members
- Candidates
- Departed members
- Province Staff
- Integrated Website
- News and Bulletins
- Transfers and Posting
- Transfer Assist
- Auto-generated Directories
- Statistics and Reports
- Members Talents and Skills
- Provincial Visit Record
- Remembrance

- Liturgy and Daily Prayers
- Daily Mass and Readings
- Liturgical Calendar
- Mass Diary
- Provincial Diary
- Province Calendar
- Homilies and Reflections
- Applications
- Digital Archive
- Present, Former Functionaries
- Budgets and Approvals
- Curia Recurring Payments
- Assets-Inventory-Rent Records
- Circulars and Downloads
- Live Streaming

- Media Library
- Opinion Poll
- Province Quiz
- Associates
- Free-Busy Calendar
- To-do List
- Guidelines
- Export custom Reports
- Export Financial Data
- Centralised Auditing
- Financial Reports
- Recurring Payments
- Community Financials
- Push Notifications
- Built in Email/SMS/Whatsapp

Managed by You. Controlled by You. Supported by Us.
